

## **HEALTHCARE ORGANIZATIONS ARE ALL ABOUT THEIR PATIENTS.**

Everything in Healthcare is geared towards ensuring the delivery of the best care and patient experience possible, and all of that is evidenced by patient, provider, and payer data. With all of the focus on healthcare data and the HIPAA regulatory requirements protecting its privacy, Covax Polymer provides data security healthcare solutions that ensure full security of, and transparency into, critical data. Whether it is monitoring and reporting on data access of protected health information (PHI) and/or personally identifiable information (PII), or protecting test, laboratory, and/or insurance information, Covax's unique data-focused security is unrivaled. And in the current Covid-19 expanded home health, telehealth, and remote health environments, health data is ever more vulnerable without the Polymer protection.
