

THE LEGAL PROFESSION IS DATA-DRIVEN AND RECORDS-DRIVEN, WITH CONFIDENTIALITY, SECURITY, AND COMPLIANCE REQUIREMENTS.

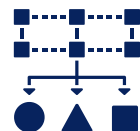

Law firms have ethical and professional mandates that pertain to everything about a client engagement, including client data. But they have become ever-increasing targets of sophisticated security hacks, while historically being ill-equipped to withstand such attacks. More recently, the legal vertical also includes e-discovery, the electronic aspect of identifying, collecting, and producing electronically stored information. Covax Polymer provides the data security solutions for the legal vertical that ensure full security of, and transparency into, critical data. Covax also enables an unalterable, auditable chain of custody to map, track, document, and analyze data, file activity, and user behavior. Covax Polymer additionally enables enterprises to take a proactive approach to regulatory compliance, through feature sets such as content search and classification, metadata tagging, data analytics, data integrity checks, etc. Various areas of regulatory compliance include: **HIPAA, FISMA, FINRA, FERPA, Dodd-Frank, PCI, PHI, PII, Sarbanes-Oxley, GDPR, CCPA, DoD 5015.2, SEC Rule 17a-4**, etc.

**FULL SECURITY AND
TRANSPARENCY**

CHAIN OF CUSTODY

**CONTENT SEARCH
AND CLASSIFICATION**

BEYOND DATA SECURITY... DATA CONTROL
